

## Willmott Dixon Group

Founded in 1852, privately-owned contracting and interior fit-out group Willmott Dixon is dedicated to leaving a positive legacy in our communities and environment. We create value for customers, stakeholders and communities by working in a sustainable and responsible way to shape the built environment and make a positive impact to society's well-being.

## Considerate Constructors Scheme

As a founding partner of the Considerate Constructors Scheme (CCS) in 1997, all Willmott Dixon sites are registered with the CCS. The scheme influences the way we design our strategy of work and we are committed to working to the higher code of conduct.

## PROJECT INSIGHT

# Royal Greenwich Trust School

Welcome to the third edition of our project newsletter. We will keep you informed as to our plans and progress towards the delivery of Royal Greenwich Trust School.

## Key team

**Chris Evans**  
Operations  
Manager

**Tony Finney**  
Senior Building  
Manager

**Jannis Reid**  
Principal  
Surveyor

**John Dell**  
Senior Building  
Manager

### Construction Manager

## What has happened?

We are delighted to inform the local community that the first phase of piling works, change over of the mains water supply (from old to new) and the change over of the electrical supply in the newly constructed sub station have all been completed.

The relocation of the site entrance has also been completed in order to allow Greenwich Trust School students and teachers to move into temporary classrooms.

*Piling Mat and Service Diversion Works Overview*

## What happens next?

In the next period (June) we will commence drainage works and ground floor slabs to form the foundations of the new building.

We will also prepare the ground surrounding the building footprint to accept the cranes and concrete pumps for the continuous building of both the steel frame in late July and the future works.

Moreover, it is exciting to highlight that we are expecting a temporary addition to our team in June – a work placement student who will have an opportunity to spend a fortnight at our site and learn from the best. In addition, we have invited Greenwich Trust School students to visit our site and office during their careers week for educational purposes. Lets hope the weather is sunny and dry for the most part in order to make the most of it.

In the meantime, please, stay on a look out for our regular progress updates and other news.

## Other news

We have also kept in tune with regards to community investment and maintained our focus on building relationships with the adjoining school residents.

It was an absolute pleasure to formally introduce ourselves to over a hundred of mainly STEM students and to deliver a presentation on our new and exciting development on careers and the latest focal point in the industry - 'women in construction'.

Hopefully, this has dealt with some prejudices and fears based on the old image of construction, to now leave a lasting positive impression. We would like to thank the school organizers and participants for a friendly atmosphere and we certainly look forward to further collaborations.
